Why Are "Duds"?

Every high school has its quota of so-called "duds" pupils who do not measure up to the standard set for high school accomplishment.

In most cases one or more causes seem to be active—either the student is not interested in the sort of work the high school offers him, or he lacks the necessary mental equipment.

It is not often that a pupil is found who is constitutionally lazy. Many children who appear to be lazy could be induced to work if the right stimulus were found; or if they were given work that they had the ability to do

It is folly for the teacher to tell an uninterested or incapable child that he is a "worthless good-for-nothing"; usually it is not true.

On the other hand, it is uneconomical administration for school boards to allow the schools to be cluttered up with uninterested and incapable pupils.

And parents who insist on such children "getting an education" very often have a mistaken idea of the meaning of the word Education.

Promptness and Accuracy.

Former Stoneyite Honored.

The election which was held last week to fill the vacancy on the Village Council resulted in John Barth gaining the position by a majority of 12 votes. Number of votes polled 129—Barth 70, Stahl 58, 1 spoiled ballot.—Millet News.

Missionfest at Stony Plain.

Owing to the unsuitable weather on Sunday last for outdoor service, the Missionfest of the congregation which worships at the Lutheran chapel in Stony Plain was held indoors, instead of on the Fair Grounds, as had been planned.

The morning service was conducted by Rev. Prof. A. Guebert of Edmonton, who preached in English.

The same clergyman conducted the service in the afternoon, when he gave an address in German.

The evening service was in English, and a fine address was delivered by Rev A H Schwerman.

Each of the services was well attended. Rev E Eberhardt, pastor of St Matthew church, was present at the services.

Alberta to Benefit by Wheat Bonus.

Payment of the 5c a bu. bonus on wheat by the Federal Gov't will put about five and a half million dollars in the pockets of Alberta farmers, estimated on prospects of a wheat yield between 110,000,000 and 112,000,000 bu. This is considered a conservative estimate. Receipts are being on deliveries now being made at country elevators until payment of the bonus goes into operation.

Sunday Evening Blaze.

Shortly before 9 o'clock on Sunday evening smoke was seen issuing thru the roof of the town residence of Mr Alec Bauer, on 1st St west. An alarm was sent in, and a crew of volunteers was quickly gathered at the firehall, where the engine was run out to the tank, and the hose laid.

Following the turning on of the water, a defective length of hose was discovered, and the water was turned off again. In the meantime the four-wheeled water tank was rushed to the scene, and good work was done by the bucket brigade, altho a strenuous objection was entered to the use of the round bottom buckets by the temporary Acting Assistant District Deputy Fire Chief.

The cause of the fire is a mystery, as Mr Bauer and family drove away early that morning to their farm at Glory Hills, and had not returned up to the time when the blaze was discovered.

The most damage appeared to have been done by water, and a small insurance was carried.

'Fresh from the gardens'

Courtesy and Safety

"Why is it," remarked the Observant Man, "that a man, who may accidentally jostle you in a crowd, turns and says 'I'm sorry,' or 'I beg your pardon,' but who, when he gets behind the steering wheel of a motor car, throws all ideas of courtesy to the winds and acts as if you had no rights whatever, even the right to live?"

It is the unsolved puzzle of this present age. A man ordinarily polite and courteous, who, if he bumped into another couple when dancing, or stepped on his partner's toes, would express his regrets, when engaged in motoring act, all too frequently, like an ignorant, uncouth boor. He who would hesitate to steal so much as a lead pencil from another, thinks nothing at all of stealing the right-of-way at a road intersection, even from a lady, considers he has done something smart, and even derides or joshes those whom he has made his victim. Yet he is guilty of theft, not only in a moral sense but actually in a legal sense, because the law declares it an offence to take the right-of-way from another to whom it belongs.

Many a motorist, who, if standing on his own two legs on the shore of a lake would never even entertain the thought of pushing a non-swimmer into deep water at the peril of his life, nevertheless does not hesitate to crowd a fellow motorist,—possibly a beginner in the art of driving,—off the road at the risk of smashing the other's car and possibly seriously injuring or killing him.

And why is it that so many men, ordinarily polite and courteous, refined in language and manners, become abusive, profane and quarrelsome over some slight mishap on the road? What is it about a motor car, or the pleasure or business of motoring, that so completely changes many men, and women, too, from their usual tenets of conduct into the most disagreeable creatures, reckless and regardless of the rights, comfort and safety of others?

Is it merely because the modern motor engenders such speed that the drivers of cars become reckless, heedless, and for the time being at least are no longer normal human beings? Or is it that peculiar quirk in our human makeup that seems to impel us to do what both commonsense and the law says we are not to do?

The conduct of not a few, but countless thousands of motorists is an unsolved mystery. No man, except he be a maniac, would think of throwing vitrol into another's face and thereby blinding him, but to anyone used to travelling our highways at night it would seem that the vast majority of motor car drivers think nothing at all of driving past approaching cars with powerful, glaring headlights completely blinding for the time being the drivers of those other cars, and inviting terrible disaster. Is it that they are just too lazy to be even bothered to dim their own lights for a few seconds? Or is it something else, some petty meanness of disposition, some un-understandable twist in their character which does not at other times display itself?

And yet courtesy is such a fine trait, a simple thing, something that costs nothing, but which is the hallmark of the true gentleman.

And how much pleasure it would add to motoring if courtesy, instead of a rude boorishness, became the universal habit of the road! And, oh, how much it would add to the safety of the road!

Governments provide rules and regulations governing the condition of cars; Automobile clubs and associations conduct campaigns of education; tests are provided for brakes, lamps, tires, steering gear, etc., and all serve very useful purposes. But a uniform, universal recognition and acceptance of the ordinary rules of courtesy by one toward another, and by each toward all, would do more than any one thing to obviate accidents with their present appalling bills for damages and irreparable loss of life.

As a nation we are striving with might and main and the expenditure of fabulous sums of money to combat tuberculosis, cancer, and dread diseases of one kind and another; we are engaged in conservation of our forests, our streams and water-powers, our fisheries, our minerals; we spend millions on research work to combat rust in wheat, grasshoppers, and other pests which destroy the proceeds of our agricultural labours,—yet we go blithely on taking human life recklessly, needlessly, maiming many more, and destroying millions of dollars worth of property annually through the agency of the automobile, which to many has become a dread and a menace when it ought to be a joy and a blessing.

And such a little thing, such a simple thing, as the practice of a uniform courtesy would serve to revolutionize the situation for the better. Why not try it for a change! Let a little courtesy do its good work.

Barred From U.S.

William Shier, 48, who was returning to his home in Gary, Ind., after being two weeks at the bedside of his mother in Newmarket, Ont., has been refused re-entry into United States by United States immigration authorities. It is alleged that he entered United States illegally seven years ago at Portal, N.D.

A newspaper man's son says that editors call themselves "we" so that the man who doesn't like the article will think there are too many people for him to tackle.

Douglas' Egyptian Liniment is an excellent leg wash for stock. Also removes corns in horses and quickly relieves bruises, sprains, swellings and joint stiffness.

Has Tame Butter Flies

A Philadelphian has developed what is said to be one of the finest collections of live butterflies in the United States. For many years Daniel G. V. Laning has made a study of the beautifully coloured insects, raised them and tamed them. Now, he says, they will alight on his paper while he is reading and not move until he is ready to turn a page.

The Mother of Seven Children Used It for Diarrhoea

Mrs. Ray Drinkwater, R.R. No. 2, Hagersville, Ont., writes:—"I am the mother of seven children, and last summer one of them, 17 months old, was taken very sick with diarrhoea, and I thought she was going to die.

"My husband went 7 miles to see what my sister had given her baby, and he came home with a bottle of Dr. Fowler's Extract of Wild Strawberry. I gave the child a few doses and she was soon well again.

"My other children also had diarrhoea at that time and I gave them 'Dr. Fowler's' with the same results."

Japan's Population

Is Increasing By Nearly a Million Every Year

One or two competent writers on Japan having announced lately, with some confidence, that the population question in the Japanese Empire would settle itself because the rate of increase was steadily slowing down, the figures of the 1931 census now emerge to shatter that comfortable doctrine. The birthrate in Japan is not going down, it is going up. And the population is increasing at present by nearly a million every year. That fact may not be as disturbing to the rest of the world as it sounds. The Japanese, for all their apparent need for emigration grounds, still show little desire to emigrate on any considerable scale. But the alternative is to convert Japan systematically from an agricultural into an industrial State.

DRAPERIES MADE NEW

"When we resumed housekeeping a month ago I found my draperies had become creased from packing. I hung them out on the line, hoping to remove the creases. Then I forgot them. The result was they became badly faded and sun-spotted.

"I was heartsick until the happy thought struck me to dye them. I just dyed them a deeper green, and as I used Diamond Dyes they look gorgeous and new. I have never seen easier dyes to use than Diamond Dyes. They give the most beautiful colours—when used either for tinting or dyeing—and never take the life out of cloth as other dyes do."

Mrs. J.F.T., Montreal.

Preparing Relief Camps

Ontario Government Getting Plans In Shape For Unemployed

Payment of 30 cents an hour for an eight-hour day, with a deduction of 80 cents a day for board and 50 cents a month for medical services will be made to men employed in the relief camps being established in northern Ontario by the provincial government for the construction of the Trans-Canada Highway.

Official details of the administration of the camps were issued by Hon. William Finlayson, Minister of Lands and Forests. Present plans are to get the camps into operation early in October.

There will be no military methods but provincial police will be available whenever required at the camps.

Persian Balm invests every woman with subtle charm. Delicately fragrant. Cooling and healing. Dispels all roughness or chafing. Makes skins delightfully soft-textured. Every woman should use this peerless toilet requisite. Daintiness—beauty—refinement—Persian Balm achieves these in every instance. Softens and whitens the hands. Promotes clear and youthful loveliness. All women who care for additional charm unhesitatingly choose Persian Balm.

Many Years a Sailor

Earl Jellicoe Held Position Of Junior Officer In 1893

It seems ages ago in this whirling world since the disastrous collision in the Mediterranean between the "Victoria," flagship of the fleet, and the "Camperdown," and it is almost startling to recall that Earl Jellicoe, Canada's distinguished visitor, was a junior officer on the ill-fated "Victoria." Though stricken at the time with fever, he plunged into the sea and was among those rescued—in his case to give further distinguished service on another flagship of the fleet. Earl Jellicoe took to the sea when young, as the "Victoria" went down in June, 1893; and he is far from being an old man.

Drives Asthma Before It. The smoke or vapor from Dr. J. D. Kellogg's Asthma Remedy gives asthma no chance to linger. It eradicates the cause. Our experience with the relief-giving remedy shows how actual and positive is the succor it gives. It is the result of long study and experiment and was not submitted to the public until its makers knew it would do its work well.

High Quality Canadian Cattle

Shipments of Canadian cattle to Great Britain have proven at times of such a high quality that the live-stock sold on a par with Scottish home-killed beef according to John Byers, secretary of the council of Western Beef Producers. The Canadian cattle he added, at some periods, had been sold in preference to the Irish importations.

Bronze Statue Honours Hardy

Unveiled By Sir James Barrie At Dorchester, England

Unveiling a lifesize bronze statue of Thomas Hardy, the work of Eric Kennington, here in Hardy's native Dorchester, Sir James Barrie, creator of "Peter Pan," told how nearly the world came to missing altogether the late novelist's services.

"When the child Hardy was born," said Sir James, "the doctor thought him dead and dropped him into a basket. But a woman stepped forward to make sure and found he was alive. A statue to this woman—Mr. Kennington could have done worse than give us that."

It is usually safe to say that when a child is pale, sickly, peevish and restless, the cause is worms. These parasites range the stomach and intestines, causing serious disorders of the digestion and preventing the infant from deriving sustenance from food. Miller's Worm powders, by destroying the worms, correct these faults of the digestion and serve to restore the organs to healthy action.

Woman Wins Air Derby

Aviatrix From Memphis, Tenn., Carries Off All Honours

Mrs. Phoebe Omlie, of Memphis, Tenn., was officially announced as the winner of the transcontinental handicap derby from Santa Monica, Cal., after she had taken a large share of the honours at the national air races.

The contest committee announced that Mrs. Omlie had won the handicap race, in which 50 or more women and men competed, with a rating of 109.19 points. She won the grand prize as well as the prize for the women's division. D. C. Warren, of Alameda, Cal., won the men's division of the race with 103.5 points.

White was the colour of royalty during some stages of Egypt's ancient history.

Co-Operative Wool

Manitoba and Saskatchewan Shipments Reach High Figures

The Canadian Co-Operative Wool Growers, western branch, report the receipt during July of 552 lots of wool at Regina, and of 502 lots at Portage la Prairie; the total Manitoba receipts amount to 200,624 pounds, and Saskatchewan receipts about 333,000 pounds. Up to the end of July eleven cars have been shipped from Regina, seven from Portage la Prairie and one from Marchand. During the month four contracts were received from Manitoba sheepman, covering 130 fleeces and thirteen contracts from Saskatchewan sheepmen covering 984 fleeces.

Bears Killing Alberta Cattle

Right to shoot bears in Waterton Lakes National Park, in southwestern Alberta, was sought by ranchers of the district. Cattle on ranches in the territory have been killed and carried within the park confines before ranchers were able to defend their cattle.

No Longer Bilious—Thanks Vegetable Pills

"I suffered with Biliousness for days at a time. Every medicine I tried failed to bring relief . . . the first dose of your wonderful Carter's Little Liver Pills gave me great relief."—Mrs. C., Leigh.

Dr. Carter's Little Liver Pills are no ordinary laxative. They are ALL VEGETABLE and have a very definite, valuable tonic action upon the liver. They end Constipation, Indigestion, Acidity, Headaches, Poor Complexion. All druggists. 25c & 75c red pkgs.

The Great Importance Of Experimental Farm Work In Fibre Crop Production In Canada

It would be very difficult to estimate in dollars and cents the value of the work done in Canada by the fibre crops division, which operates under the direction of the Dominion Experiment Farms System. The Division of Economic Fibre Production embraces work in a relatively large and varied field of endeavour, and it is almost as directly connected with manufacturing activities as with cultural conditions.

There are some twenty projects under way at Ottawa in connection with problems that have confronted flax and hemp growers at various times. It is important to have an accurate record of the varieties best suited to the cultural and climatic conditions of Canada, and these records become more valuable as additional information is revealed from year to year.

The application of fertilizers best suited to these fibre plants offers a great field for careful investigation. This work is being carried on systematically at Ottawa as well as at a number of the branch farms extending from British Columbia to Nova Scotia, so that results may be analyzed, compared and recorded for future reference.

The central experimental farm at Ottawa is equipped with a modern flax mill in which flax and hemp preparing machinery of all kinds are given rigid tests. The farmer benefits from such a service because he knows that if the machinery he is interested in is given an unbiased and thorough test under government supervision, he will receive reliable information concerning it.

Then too, the fibre division of the central experimental farms system renders an extremely important marketing service.

During the year 1930 flax growing in eastern Canada received $5.50 a bushel c.i.f. Belfast, Ireland for a special variety of flax seed known as J.W.S. This variety was originated by an Irishman named John W. Stewart, and was sent to Canada in 1922-29 for a test propagation by the Ministry of Agriculture for northern Ireland. During the year 1930-31 the price received for this special pedigree flax seed was $4.68 per bushel. The business end of these transactions was handled by the fibre division through the Ministry of Agriculture, northern Ireland and the seed was cleaned for the farmers and inspected free of charge by the Canadian Government.

W. J. Megaw of the Ministry of Agriculture for northern Ireland stated in a letter received by the fibre division on the 20th of May, 1931, that "in counties Antrim and Derry the demand was largely for Canadian J.W.S."

This report is particularly gratifying in view of the fact that more than Canadian interests are bargaining for this market in Ireland.

During this past year farmers in the districts of Rhein, Saskatchewan, and Portage la Prairie, Manitoba, were given assistance in the handling of their respective hemp crops. This service was rendered in order to stimulate and encourage the establishment of a cordage industry in the west.

Also, this past year, a specialist was sent from Ottawa to British Columbia to carry on extensive experiments in the growing and handling of flax for fibre purposes. The results showed that British Columbia can produce a quality of fibre that compares very favourably with the best grades of Irish flax fibre.

Another service which has received favourable commendation is the installation of small demonstration flax mills in certain flax growing districts. These mills are equipped with a flax breaking machine and three or four scutching blades, as the case may be. The government supplies the machinery and the interested parties supply the accommodation and the power to run the machinery.

Hundreds of samples of the best fibre flax seed are mailed free of charge to farmers each year and applications for these samples is made to the fibre division from all parts of Canada.

When these facts have been duly considered one realizes the real value of experimental farms work in fibre crop production in Canada.

Ocean Travel De Luxe

All-Electric Kitchen Will Provide 12,000 Meals a Day On New Cunarder

A wonderful all-electric kitchen, which will provide 12,000 meals a day, is being planned by the catering experts of the Cunard Line for the new 73,000-tons liner now being built at Clydebank.

The liner will carry over 3,000 passengers and 500 crew, and for the big task of feeding them 100 highly-paid chefs will be employed in the all-electric kitchen. The kitchen has many novel devices, including machines for keeping the ovens and grills at certain temperatures and instruments which wash thousands of plates and dishes in a few minutes. It will also be possible to cook simple dishes without attention.

The wine experts of the company have evolved new methods to ensure that all wines will be kept in perfect condition even though the liner may be running through heavy weather. Wines are purchased five years before they are used in Atlantic liners, and for years now the wines for the new Cunarder's cellar have been waiting for the maiden voyage. The cellar will be one of the largest and best in the world.

Great progress is being made in the construction of the Cunarder, the castings for the gear wheels and turbines, and the stern bracket, one of the largest ever made, are nearing completion at Darlington and Sheffield. Half the boiler installation is complete, and 1,000 miles of electric cable are ready for installation.

Industrial Moose Jaw

Moose Jaw now has an industrial area of about 50 city blocks, the city council having set aside three subdivisions for the purpose—Prairie Heights, Westmore and Sunnyside. The area lies roughly between the main line of the Canadian Pacific and the Outlook line branch.

Tin exposed to extreme cold may crumble to dust.

Bonds Of Empire

Earl Jellicoe Refers To Important Part Played By Canada.

Great Britain is looking to Canada to provide a lead in strengthening the British Empire, declared Earl Jellicoe, president of the British Empire Service League, addressing an Empire Club luncheon at Toronto. Coupled with this remark was his confident assurance that Britain would surmount present difficulties and emerge successfully from the national crisis.

The Admiral of the Fleet recalled feeling which existed in the Dominion in the '90's that Canada should separate from the Empire and throw in her lot with the United States. The Canada of today was sufficient answer to the fear that such feeling might ever lead to action.

The observation of Empire Day in Canada had developed from that feeling, he said. "It is well that our children should realize the common loyalty which binds the Empire; the tie of blood and the tie of respect and honor which we give to our king.

"Canada has played an immense part in the empire's work; Canada has fought in the common cause, and I have no doubt she would do it again. . . . . We of the Mother Country will look to Canada to give us a lead in the strengthening of the ties of Empire."

How To Keep Milk

Keeping Milk In Proper Condition For Home Use

Four little words tell the whole story about how to keep milk in proper shape for use in the home. These are "Clean, Cool, and Covered." This is one of the fundamental rules of home economics to which the Dairy and Cold Storage Branch calls special attention. For best results milk should be served at the end of the meal, and it should always be sipped slowly. Milk is the ideal food for children of all ages because of its high quality and quantity of protein, its abundance of calcium, its readily assimilable phosphorous content, its iron and its easily digested fat and sugar.

Radium Not Cure-All

But Has Accomplished Much In Treatment Of Cancer

Cancer control was the greatest problem of health today, and radium had come to the fore as a potent agent. It was not a panacea, for even in skilled hands its results were often disappointing, but, on the whole, the world of medicine could look with satisfaction upon what it had already accomplished, Dr. Joseph Muir, famed New York cancer expert and physical therapist, stated in addressing the convention of the American Academy of Physical Therapy, held at Montreal.

Southern Alberta Wool

Shipments of wool from Southern Alberta to the Canadian Co-Operative Wool Growers' warehouse at Weston, Ont., have broken all records, according to a report issued by N. T. Macleod, secretary of the Southern Alberta Sheep Breeders' Association. Deliveries made to date aggregate 1,800,000 pounds, the wool clip being unusually heavy this year.

Growing Habit Of Buying Empire Goods Gains Impetus In The United Kingdom

"The growing habit of buying from within the Empire has attained an impetus in the United Kingdom," states the report of the Empire Marketing Board just published, "which even the world-wide economic depression has been powerless to retard."

The report for 1929-1930 shows that twenty-five new records had been set up, in the year under review, by Empire foodstuffs, as regards volume of imports into the United Kingdom. Apples from Canada and from New Zealand reached record quantities in 1930, as did bananas from the British West Indies, butter and cheese from New Zealand, coffee from British East Africa, currants from Australia, eggs from Australia and South Africa, grapefruit from South Africa and Palestine, lamb from New Zealand, oranges, peaches, plums, sugar and wine from South Africa, pears from four Dominions, and tobacco from India.

A number of other foodstuffs are mentioned which surpassed all previous years, except 1929. These include Australian raisins and sultanas, New Zealand frozen pork, Ceylon tea, Australian sugar, and British Malayan canned pineapples.

The people of the United Kingdom are reported to be buying steadily more and more from within the Empire. Many factors have combined to bring about this result. First, more attention is being paid today by Empire producers to the need for grading and orderly marketing. Secondly, distributive traders have shown themselves resolved to further the progress of Empire buying on sound economic lines. Thirdly, the contact between producers overseas and wholesale and retail traders in the United Kingdom is growing closer. Fourthly, consumers in the United Kingdom are becoming more aware of the excellence and wide range of Empire products.

Since the report was issued the imports of Canadian cattle on the hoof, both for further feeding and for slaughter at port have been resumed on a considerable scale and it is possible, if the hog runs this fall justify it, that Canadian bacon imports into Great Britain will increase before the end of 1931.

Wilkins' Trip Important

Only Way Certain Scientific Phenomena Can Be Obtained

Star dust on the bottom of the sea, among other scientific things, has drawn Sir Hubert Wilkins, submarine polar explorer, into great danger, in the opinion of Vilhajalmar Stefansson, who once led Sir Hubert on another polar trip.

Infrequently heard from, Sir Hubert is now in the great Arctic ice pack about 350 miles from the north pole, Mr. Stefansson said, "Sir Hubert undoubtedly cannot much longer delay his return from the ice because the summer season virtually is finished."

Mr. Stefansson emphasized the importance of Sir Hubert's trip explaining that in no other way can certain important scientific phenomena be obtained.

"Star dust is probably the most romantic of these phenomena. Scientists hold that dust from outer space is deposited in the polar regions in comparative purity, whereas in other parts of the world it is mixed with terrestrial dust. Obviously any samples that Sir Hubert can obtain from the bottom of the sea will be of use to science.

"Sir Hubert also seeks to weigh the earth from the north which is the shortest radius to the centre of the earth. The earth already has been weighed from the equator, where the radius is longest, and a comparison of the two weights will disclose important phenomena about, among other things, the mineral constitution of the earth.

"By use of the Sonic depth finder, Sir Hubert can make an almost unbroken contour map of the bottom of the Arctic sea. Sir Hubert also can observe water life in the Arctic sea as no other explorer could—by actually being under the surface where the life exists. He also can make important weather observations, investigate water temperatures and otherwise fill in the innumerable gaps that exist in our Arctic information.

"Probably three years will be needed for the completion of the work of the expedition.

Manitoba Wheat

Test Shows High Protein Content This Year

Dr. F. J. Birchard of the research laboratory of the Canadian Board of Grain Commissioners, in a test made for protein content in the wheat crop of Manitoba, shows that the wheat crop of the province has a maximum of 18.3 per cent. as against a maximum of 14.5 per cent. last year and a minimum of 10.2 per cent. this year as compared with 8.4 per cent. last; the average being 12.25 per cent. against 11.5 per cent. in 1930. The test grains were taken from the same districts as last year.

Time cannot remove kindly acts from a grateful heart.

Grain Grades High

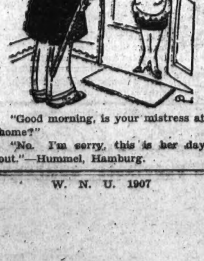
Exceptionally High Quality Of This Year's Crop Is Noted

"Grain which has passed through the inspection department at Winnipeg in the last few days is of exceptionally high quality," it was stated by J. D. Fraser, chief grain inspector at Winnipeg, in a recent address before the officials of the World's Grain Exhibition and Conference at Regina. "A considerable amount has graded No. 1 hard; a great deal has gone No. 1 Northern, and some has graded No. 2 Northern on account of mixtures of durum and barley."

Ship Horses To Montana

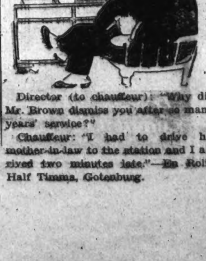
During a recent week sixteen carloads of horses, rounded up in the Medicine Hat district, were shipped to the Montana Horse Products Company at Butte. Mr. Chipman, who is buying for the Butte concern, was unable to estimate the coming requirements of his firm from Canadian territory, but the demand may run to 20,000 head.

Education is first Aid to finding out how little you really know.



"Good morning, is your mistress at home?"

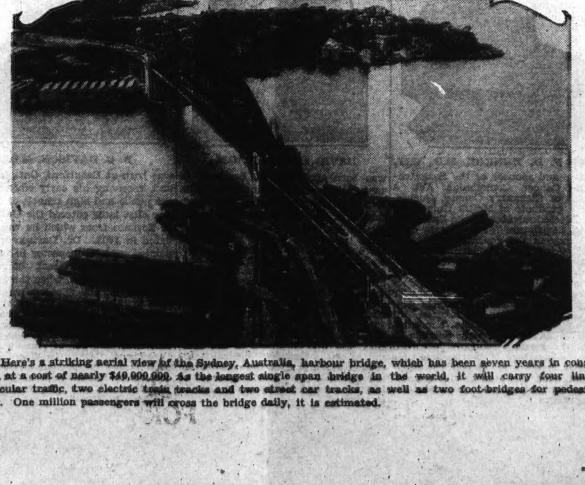
"No. I'm sorry, this is her day out."—Hummel, Hamburg.



Director (to chauffeur): "Why did Mr. Brown dismiss you after so many years' service?"

Chauffeur: "I had to drive his mother-in-law to the station and I arrived two minutes late."—En Rolig Half Timma, Gotenburg.

LONGEST SINGLE SPAN BRIDGE IN THE WORLD



Here's a striking aerial view of the Sydney, Australia, harbour bridge, which has been seven years in construction, at a cost of nearly $49,000,000. As the longest single span bridge in the world, it will carry four lines of vehicular traffic, two electric train tracks and two street car tracks, as well as two foot-bridges for pedestrians only. One million passengers will cross the bridge daily, it is estimated.

PUT HIM OFF HIS PIPE

Indigestion and Acidity

"A few months ago, I had an attack of indigestion, heartburn and acidity, and had no appetite for meals, especially breakfast. I am a pipe smoker, and for several days I felt so ill I could not even look at my pipe. I decided to try Kruschen Salts. A few days afterwards I found that the heartburn and acidity had gone, and for the last five or six weeks I have been in my usual good health. I can now enjoy my pipe-smoking, and in fact feel about 10 years younger."—R. P.

When your digestive juices fail to flow freely your food lies in the system and ferments, thus causing the distress of indigestion. The "little daily dose" of Kruschen first stimulates the flow of the gastric juices, and then ensures complete, regular and unfailing elimination of all waste matter every day.

SUNDAY SCHOOL LESSON

SEPTEMBER 20

THE COUNCIL IN JERUSALEM

Golden Text: "For ye, brethren, were called for freedom; only use not your freedom for an occasion to the flesh, but through love be servants one to another."—Galatians 5.13.

Lesson: Acts 15.1-35; Galatians 2.

Devotional Reading: Romans 8.1-10.

Explanations and Comments

A Deputation Sent From Jerusalem To the Church At Antioch, Acts 15.22.—When certain men came from Judea and taught the brethren at Antioch that they could not be saved unless circumcised after the manner of Moses, it became evident that the whole question of Gentile Christianity must be settled once for all and settled speedily.

The Church appointed Paul and Barnabas and others (among them Titus, Galatians 2.1), to go to Jerusalem and work out the problem in consultation with the apostles and elders. Read the first twenty-one verses of our chapter. The Council selected two of its outstanding men, Judas and Silas, to return with Paul and Barnabas and deliver its decision to the church at Antioch. "Judas called Barsabbas" may have been brother to "Joseph called Barsabbas," candidate with Mathias as successor to Judas Iscariot (Acts 1.23). Silas became Paul's companion on his Second Missionary Journey, and in the next three chapters of The Acts he is frequently mentioned.

The Earliest Formal and Official Document Issued By the Christian Church, Acts 15.23-29.—With the delegation a letter was sent, directed to "The Gentiles in Antioch, and Syria, and Cilicia." The churches founded by Paul on his first missionary tour are not mentioned, either because they were apparently unaffected as yet, or because the frowness of the Jews in those centers made it unnecessary to accentuate any restrictions.

The letter wholly repudiated the teaching of the Judaizers to whom the church at Jerusalem had given no commandment to declare that Gentiles must be circumcised, and keep the law. They did not have any authority at all from the apostles when they were thus troubling the church at Antioch with these words and so "subverting their souls." The word "subverting" literally means the entire removal of goods and chattels, to pack up baggage and carry off, to dismantle. It expresses with striking pictorial strength the idea that these false teachers were taking away from the Gentile converts their entire possession of Christ. As Paul says in Galatians 2.4, "They came in privily to spy out our liberty which we have in Christ Jesus, that they might bring us into bondage."

Judas and Silas, after exhorting the church, returned to Jerusalem. Paul and Barnabas remained at Antioch for some time, preaching and teaching the word of the Lord.

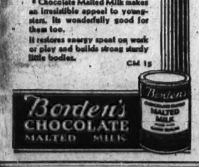
One machine now being used on Canadian farms can cut and thrash grain on 40 acres in a day with only two men operating it.

Children love it

THE delicious flavor of Borden's Chocolate Malted Milk makes an irresistible appeal to youngsters. Its wonderfully good for them too.

It restores energy spent on work or play and builds strong sturdy little bodies.

CM 18



Saskatchewan's Cancer Campaign

Hon. Dr Munroe Announces Opening Of Radium Emanation Plant and Cancer Clinics

Saskatchewan has the lowest death rate of Canadian provinces, and the lowest death rate from tuberculosis, cancer, diseases of the heart, pneumonia and automobile accidents.

These statements of fact are based on Canadian Vital Statistics for 1930, recently released by the Dominion Bureau of Statistics. They demonstrate, unequivocally, Saskatchewan's leadership in matters pertaining to the health of its people.

While several factors have contributed to the spectacular showing of Saskatchewan in statistical records giving the comparative death rates of the various provinces and the Dominion, one that should not be overlooked is the very effective contribution made by the Saskatchewan Department of Public Health, presided over by Hon. F. D. Munroe, M.D., as Minister. The province is noted for its advanced health legislation, and its achievements in the campaign against tuberculosis are too well-known to require citation. It was only to be expected, then, that, when cancer started to claim particular attention as a "major killer," Saskatchewan should be the first province of Canada to tackle the disease as a public health problem.

The psychological opportunity came, in 1929, with an exceptionally favourable combination of circumstances. The medical profession had surveyed the cancer situation and been seized of the necessity of intensive efforts being made to combat the cancer scourge. But someone was required to crystallize the thoughts and ideas of the medical men into action. That person presented himself in Dr. Munroe who, having been elected to the Legislature as member for Moosomin, and appointed Minister of Public Health in September, 1929, immediately grasped the chance and formulated a policy which gained the support and endorsement of the entire medical profession of the province.

The campaign against cancer, then, first conceived in 1929, was presented in tangible and actionable form in the 1930 session of the Legislature when Dr. Munroe, in his first session as Minister of Public Health, piloted the Saskatchewan Cancer Commission Act through the Legislature and was voted a sum of $115,000 for the purchase of radium and equipment. This year, a further sum of $30,000 was voted him for administrative purposes.

Pursuant to the Act, a permanent Saskatchewan Cancer Commission was appointed, the members being Hon. Dr. Munroe, Dr. David Low, Regina, and Dr. R. O. Davison, Director of the Communicable Diseases Division of the Department of Public Health. Drs. Munroe and Low are graduates of McGill University, while Dr. Davison is a graduate of Toronto.

When the Commission settled to the gigantic task assigned to it, difficulties were experienced from the start in arranging for the supply of radium essential to the programme contemplated. During the interim between application for, and actual purchase of, sufficient supply to start operations, contacts were established by which the Commission obtained access to the latest data in cancer research, and definite plans for the provincial campaign were formulated to the end that no undue delay would follow receipt of the radium and institution of the actual, clinical programme.

So well were the plans laid that, immediately a supply of radium was obtained, Hon. Dr. Munroe was in position to announce that one of the first emanation plants west of Montreal had been established at the University of Saskatchewan to supply clinics in the main centres with radium gas in "seeds" and other suitable containers, for treatment of cancer cases. This emanation plant, it is stated, will not only produce sufficient seeds to meet provincial requirements, but will ultimately be the source of supply of provinces to the west.

The story of Saskatchewan's campaign is best told in the words of its author and sponsor, Hon. Dr. Munroe:

"It was in June of last year, that I announced the personnel of the Saskatchewan Cancer Commission and, since their appointment, the members have been giving their attention to the various problems involved.

"It should be recognized that this Commission is not a temporary one, but a permanent body appointed to carry out the provisions of the Act, its functions including inquiry, education and treatment. We have been able to place an order for radium and are now in receipt of the first shipment which is in the form of radium bromide for use in the preparation of radon, or radium gas.

"In the outstanding clinics of the world, two methods of using radium in the treatment of cancer are considered valuable. One is the use of radium gas enclosed in suitable containers or applicators ("seeds"), and the other is the use of radium salt enclosed in needles and tubes made of platinum. In Saskatchewan, we propose that both methods will be used, either separately or combined, as deemed advisable. We also are making provision for the use of high voltage X-rays, both alone and in combination with surgical treatment and radium therapy.

"It is recognized that cancer cannot be dealt with in a manner that will produce satisfactory results, unless cases are available for treatment in the early stages of the disease. Consequently, with the co-operation of the medical profession, the Commission proposes to adopt an effective educational programme to facilitate early diagnosis and treatment. Consultative diagnostic clinics are being established in two centres, in connection with treatment clinics and also in connection with existing general hospitals. It is believed that more satisfactory results will be obtained by such procedure than by having separate institutions for cancer cases.

"In addition to this, the programme in Saskatchewan will follow the line approved and endorsed by the outstanding authorities on cancer treatment. That is to say, instead of following the very doubtful procedure of distributing radium supplies to physicians in all parts of the province upon requisition, the care of cancer patients will be confined to the established centres. This plan involves definite centralization of cancer treatment, and is based on the experience of other places which is, that cancer requires expert treatment and experienced care if adequate results are to be obtained.

"Cancer is, as a rule, a progressive condition, and the centralization of cases will be of distinct value to the patients, permitting, as it does, periodic re-examination under expert attention, and prompt re-treatment of recurrencies or metastases. Such a procedure also will be of definite value to us in carrying out provisions of the Act, by enabling us to follow up cases that receive treatment in order that complete and detailed statistical records may be compiled which, later, will serve as a guide in arriving at, and assessing the value of, the procedure used. This following-up of cases, with compilation of the data obtained, will be essential to providing the citizens of Saskatchewan with the most effective known treatment of the disease."

Referring to Saskatchewan's outstanding record as shown in comparative vital statistics, Hon. Dr.. Munroe said:

"Saskatchewan is situated very favourably in comparison with other provinces of Canada and states of the American Union. Saskatchewan's death rate from cancer in 1928 was 55.2 per 100,000 population, whereas the older provinces and states recorded a rate in excess of 100. But those figures do not tell the whole story in this province. In 1905, the death rate from cancer was only 8.8, whereas in 1919, it was 33.1 per 100,000. Thus it can be seen that cancer deaths are increasing at an alarming rate. In the ten-year period prior to 1928, the cancer deaths per 1,000 deaths from all causes in Saskatchewan, increased from 38.3 in 1919, to 76.2 in 1928. That means the rate has practically doubled in that period."

In conclusion, the Minister of Public Health said:

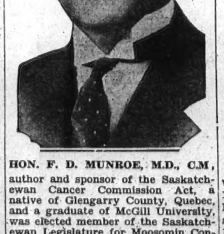
"Cancer is a disease of the adult and later life span. In Saskatchewan, the percentage of living persons over 40 years of age is smaller than in the older provinces. Consequently, the present appears to be the opportune time to begin operations against the cancer scourge, by making suitable preparations to provide the citizens of this province with the latest and most approved methods available of cancer treatment."

Country Cousin (in town)—Out in the country we have to treat the maids and other help like one of the family!

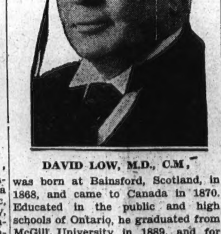
City Cousin—Goodness! Really? Here we have to treat them with great respect!

Louisiana leads the United States in quantity production of furs.

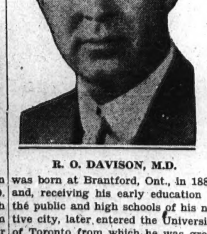
SASKATCHEWAN CANCER COMMISSION



HON. F. D. MUNROE, M.D., C.M., author and sponsor of the Saskatchewan Cancer Commission Act, a native of Glengarry County, Quebec, and a graduate of McGill University, was elected member of the Saskatchewan Legislature for Moosomin Constituency in the general elections of 1929. Appointed Minister of Public Health in September of that year, upon accession to office of the present Government, Hon. Dr. Munroe immediately applied himself to the cancer problem, his efforts resulting in passage of the Cancer Commission Act within the short space of five months. This, he admits, was made possible by the wholehearted support accorded him by members of the medical profession, irrespective of political affiliation. Hon. Dr. Munroe also inaugurated the Saskatchewan mental health programme.



DAVID LOW, M.D., C.M., was born at Bainsford, Scotland, in 1868, and came to Canada in 1870. Educated in the public and high schools of Ontario, he graduated from McGill University in 1889, and for some time was house surgeon in Montreal general hospital. In 1890, he commenced practice in Regina and, from 1894 to 1901, was medical health officer for the city. Dr. Low was active in the establishment of the Regina Victoria Hospital and organized the Regina Medical Association. In 1913, he was elected president of the Saskatchewan Medical Association, and was chairman of the committee of the Canadian Medical Association which drafted the constitution upon which the Royal College of Physicians and Surgeons of Canada is founded.



R. O. DAVISON, M.D. was born at Brantford, Ont., in 1885, and, receiving his early education in the public and high schools of his native city, later entered the University of Toronto from which he was graduated in 1908. Dr. Davison was appointed medical inspector in the Saskatchewan Department of Public Health in 1921 and, when the Division of Communicable Diseases was organized, in 1923, became its first director. When Hon. Dr. Munroe decided to institute a programme to deal with the cancer problem, Dr. Davison was placed in charge of the work as Director of Cancer Service. He has been active in medical circles since coming to Regina and, in 1920, was president of the Regina and District Medical Society.

The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE

WHAT CAME BEFORE: Captain Jimmy is flying to Japan with the Chinese General Lu. They run out of gasoline and are forced to land on a deserted island in the Chinese Sea.

After our adventure with the shark, we climbed up on the high rock that stood in the centre of the little deserted island. Here we lit a roaring big fire, in hope that some passing ship would see us.

All night we kept it blazing but morning broke grey and cold without a sail on the horizon. After daylight, we piled on wet wood until a great pillar of white smoke went up to the clouds but never a sign of life did we see on the still, glassy ocean.

Great smooth swells came in from the open water, rose and crashed with a dull boom against the rocks but apart from the sound of the waves, our island seemed to be the most silent, deserted spot in the world. Sometimes we'd find ourselves whispering—why I don't know—for we could have shouted all day at the top of our voices and no one would have heard us.

Day after day we kept the smoke pillar rising into the sky and night after night we kindled a huge yellow blaze on the summit rock. We almost gave up hope of being rescued. No doubt we were far from the regular steamer routes.

When we weren't gathering wood for the fire, we were hunting eggs in the sand—and believe me—they were certainly terrible. We caught a few fish — but they were very small and felt like pin cushions, they were so full of bones. Being left on a desert island isn't half as much fun as we were taught to believe when we were boys.

On the fifth night a dense cold fog came in from the sea. It smelled like sea-weed and salt water and was so thick that you could scarcely see your hand when you held it out straight. The branches dripped with moisture and we huddled close to the camp fire. Even General Lu shivered through his silk suits of clothes. Scottie sneezed in disgust and hid himself in the wood pile.

Suddenly I woke up with a start. A deep rumbling sound drifted in from the sea. I grabbed Chung and shook him and he jumped to his feet with a yell. Then the deep rumbling sound came again. Once—twice.

A steamer horn!

Sure enough. It was the deep-toned horn of a freighter. Frantically, we piled wood on the fire. I figured that some steamer was out there in the fog, not daring to move far until the air cleared. Hour after hour, we fed the fire with armsful of wood and brush. Up and down we tracked until we almost dropped from weariness. Lu forgot that he was a General and worked like a Trojan. If only the blaze could be made bright enough to penetrate the fog—

Then morning came again and a strong wind blew up from the East. Soon the air would clear. I paced impatiently up and down trying to peer through the thick white curtain of the fog.

Chung, to my surprise, lay down and prepared to go peacefully to sleep.

"Sloon we know — velly good — velly bad — no can tell," said the tranquil little Chinese. "Bleep always good — all men samee when sleep. No muchee worry."

And with that he shut his eyes and snored loudly!

Meanwhile I stared out into the white fog, wondering what the next hour would bring.

NOTE:—Any of our young readers writing to "Captain Jimmy," 2010 Star Building, Toronto, will receive his signed photo free.

VEGETABLE COMPOUND

LATE ESTIMATE OF THE WESTERN WHEAT CROP

Ottawa, Ont.—The wheat crop in the three prairie provinces is estimated at 246,400,000 bushels, in a crop report issued by the Dominion Bureau of Statistics. This is substantially below the crop of 374,500,000 bushels in 1930. While there are bumper crops in central Alberta, there is a complete failure in some southern regions of the prairie provinces. Higher wheat production is forecast in Alberta than in Saskatchewan, despite the fact that the seeded acreage in Alberta was only half that in the other province.

"If the provincial estimates are justified by the out-turn it will be the first time that Alberta has been the leading wheat-producing province," according to the report.

The total estimated yields of all the small grain crops, except fall wheat, are lower in 1931 than in 1930. In the maritime provinces, conditions and yields are very similar to 1930. In Quebec, production will be slightly lower. Wheat, rye and flaxseed production will be higher in Ontario, but the later sown oats and barley crops were reduced by summer drouth. In British Columbia, yields are generally higher than in 1930. The grain harvest has proceeded under particularly favourable weather conditions, giving promise of high quality.

"The western wheatfields held very little reserve moisture at seeding time," the report says, "so that crop growth was dependent on the rains of the growing season. These were distinctly limited and late in a somewhat triangular area bordered on the east by Brandon, Manitoba, and on the west by Medicine Hat, Alberta, and attaining its greatest width in central Saskatchewan. The eastern and northern parts of Manitoba; most of northern Saskatchewan, and western, central and northern Alberta were favoured with greater precipitation, although this came too late to make really heavy crops in many districts.

"Threshing is about two weeks behind last year but, with excellent weather prevailing, has reached good proportions in southern regions and in the Peace River district. The quality of the crop promises to be high, although there will be shrunken kernels in the south and some starchiness in the regions of high yields. The market movement of the new crop is very tardy.

"Generally speaking, the wheat crop again proved its ability to withstand adverse drouth conditions better than the other small grains. The proportional reduction in wheat yield from 1930 is much less than in barley, rye and flaxseed, with the barley crop of 1931 estimated at less than half that of 1930, and the rye crop little more than one quarter."

Receives Grain Award

Wins Alberta Championship For Best Field Of Grain In Province

Red Deer, Alberta.—Alberta championship of 1931 for the best field of grain in the province has been awarded to James Hazlett, farmer of the Balmoral district. Hazlett, whose farm is a few miles from Red Deer, captured the southern Alberta crown and later his field was given top place in the whole province.

According to the judges Hazlett's field of Marquis wheat should yield 50 bushels per acre.

Tentative Date For Radio Hearing

Ottawa, Ont.—About December 10 is the tentative date for the hearing of the radio reference before the judicial committee of the Privy Council in England, according to latest official information received. The reference is on the question of the respective rights of the Dominion and the Provinces on radio broadcasting and receiving.

Saskatchewan Horses Win

Toronto, Ont.—George T. Fraser, of Tate, Sask., took prizes for the best mare any age, and best mare three-year-old and over in the Percheron judging at the Canadian National Exhibition.

W. N. U. 1907

To Assist Agriculture

Formation Of a National Agricultural Council Is Recommended

Regina, Sask.—The formation of a National Agriculture Council whose functions would include a thorough and continuous study of agricultural policy and the marketing possibilities in Canada and foreign countries, was approved by the agricultural committee of the Canadian Chamber of Commerce here.

The action of the agricultural committee followed a day devoted to a discussion on "what is a sound policy for Canadian agriculture."

Premier J. E. Brownlee, of Alberta, and a number of noted agricultural authorities all told of the difficulties confronting the farmer of today. Though none of the speakers attempted to define a cure for the situation all agreed that the agricultural situation demanded the fullest support of the business and industrial class.

Pleas for a lower rate of credit for farmers was made by Premier Brownlee. There was something in this direction needed if Canada was to avoid a far more serious situation, he said.

The feeding of lower class grain to cattle, to produce first class livestock and dairy products instead of the farmer accepting a mere recognition for his grain on the foreign market; a body to help the farmer market his products and a decrease in farm production, were suggested as means of helping Canadian farmers out of the present situation.

Free Transportation For Settlers' Effects

Alberta Government Extends Time Limit To November 30

Edmonton, Alberta.—Free transportation of settlers' effects in the case of farmers moving from the drought areas in the south to new locations in the north will be in effect until November 30, an extension of the time limit having been made by arrangement between the Provincial and Federal Governments and the free privilege applies to passengers as well as freight up to the end of September, but for the next two months to effects only.

Mexico Will Join League

Mexico City.—Mexico's acceptance of the invitation to join the League of Nations has been cabled to Geneva by Foreign Minister Gernaro Estrada. The proposal must also come before the senate for ratification inasmuch as membership in the league implies adherence to the covenant and the Treaty of Versailles.

Will Leave For France

Winnipeg, Man.—Chief of Police Chris. H. Newton, of Winnipeg's police force, has been appointed vice-president of the International Police Conference which is to be held in Paris, France, September 28. Word of his appointment was received from New York, and he will leave for the meeting within a few days.

HEADS LEGIONNAIRES

Major John S. Roper, who became President of the Canadian Legion of the British Empire Service League when Lieut.-Col LaFleche retired, was re-elected to the important post when members of the Legion from all parts of the Dominion gathered in Toronto.

Arctic Trip Ended

Wilkins Making Preparation For Early Return To America

Longyear City, Spitzbergen. — Sir Hubert Wilkins is overhauling and refuelling the submarine "Nautilus" in preparation for an early return to America, either direct or by way of Iceland.

The chief damage done on his cruise into the Arctic was the breaking of the mast by a violent storm. The radio apparatus also was harmed but repaired on the way back. The party expressed satisfaction with the working of its scientific instruments, especially the gyro-compass.

Members of the crew, bearded and dirty, but smiling, headed for steam baths on arrival. They said that during the southward trip from Spitzbergen the vessel rolled more than at any time since they left the United States, and that some of them were seasick.

Trans-Canada Telephone

System Expected To Be Completed By December 1

Edmonton, Alberta.—The trans-Canada telephone system is expected to be completed by December 1, according to Hon. V. W. Smith, Alberta Minister of Telephones, who returned recently from the Telephone Association of Canada meeting at Minaki, Ont. The Alberta link from Calgary east is finished and work on the western section from Calgary to the British Columbia boundary will be ended by the last of November, he said.

Will Use Canadian Fuel

Winnipeg, Man.—Use of Canadian fuel has been decided upon by the Winnipeg School Board. Orders for 55,000 tons have been placed, 45,000 tons from Alberta, and 10,000 tons from British Columbia mines.

Store Grain In North

Report States That Two Million Bushels Will Be Stored At Churchill This Winter

Churchill, Man.—More than 2,000,000 bushels of grain from the Canadian west will be stored at Churchill's new elevator this fall and winter to relieve the elevator facilities at the lakehead, and to prepare for shipments of grain over the bay route next spring, according to semi-official reports here. Definite decision on the project will be reached if the two ships taking part in the movement of grain from the bay this month reach their European ports successfully.

The project is finding much favour among officials of the Hudson Bay Railway because it means train crews and staffs would be kept on at work until well on into the winter instead of being laid off in a few weeks. As well as aiding in the movement of wheat in the west the plan would make a test of the bay elevator under the rigorous winter conditions of the Hudson Bay. Many claim the north climate will affect grain in storage here.

The most of the grain will come from the Saskatoon district but some of it will be from southern Saskatchewan, Moose Jaw, and Regina, if the Government decides in favour of the scheme.

Canada Favours Arbitration

Would Support Principle Minister Of Justice Tells League

Geneva, Switzerland. — Canada's support for the principle of "arbitration, security and disarmament" — the French formula—was announced to the assembly of the League of Nations by Hon. Hugh Guthrie, Canadian delegate, who is making his first appearance at Geneva. He is Canada's Minister of Justice.

This support, he said, would be in the nature of sympathetic co-operation in whatever plan may finally be agreed upon.

Canada is in no wise a militaristic nation and Canada's armaments are practically negligible, he said.

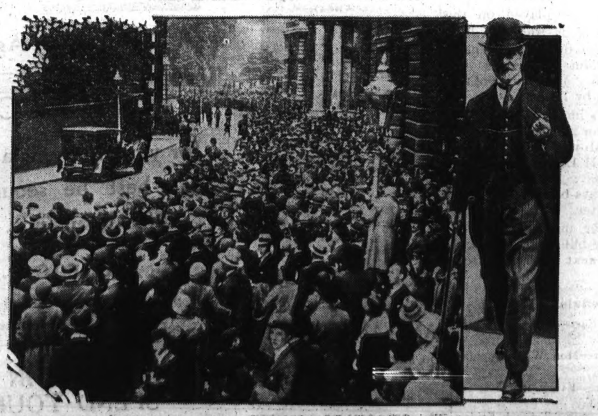
Suggest New Title

Capetown, South Africa.—"That this king's title be known in the Union of South Africa as George I., of South Africa and not George V., of Great Britain," is the resolution to be submitted to the Nationalist Party Congress by its Reitz branch, it was made known here. The branch holds this innovation justified on the ground South Africa obtained its independence in 1926."

Matter Of Federal Concern

Edmonton, Alberta.—Hon. George Hoadley, Minister of Health and Agriculture, had no comment to make on the report that 112 Hutterites were arriving in Alberta from South Dakota, except to state that it was a matter of Federal concern and the Hutterites, having satisfied Federal Immigration authorities, were now free to enter Alberta.

WHEN ENGLAND MET A CRISIS—AND WON



Here is a general view of the large crowd of Britishers which gathered in Downing Street, London, in which the Prime Minister has his official residence, to see what would develop following the downfall of the British Labour Government. When Ramsay MacDonald (right) left No. 10 Downing Street for Buckingham Palace, to confer with King George about the formation of the National Emergency Government, he was enthusiastically cheered by the great throng.

ANOTHER CIVIL WAR IN CHINA IS IN PROSPECT

Shanghai, China.—Only one month of peace has elapsed since the ill-timed rebellion of General Shih Yo-San was crushed in the north, but China is girding herself for another civil war. With the Cantonese invasion of Hunan Province confirmed, Nanking, while repeatedly professing a desire for peace, is energetically preparing for conflict.

Meanwhile the national flood relief commission approved the $70,000,000 Mexican (about $21,000,000 gold) program of Finance Minister T. V. Soong for the relief of China's destitute millions.

The activities of Chiang Kai-Shek, president of the Nationalist regime and commander of its armies, indicate he is preparing to strike swiftly and with the most formidable weapons at his command in the hope of cracking the insurgent forces before they penetrate far into Hunan.

Military experts expressed the belief that the Hunan struggle would be swift and sanguinary, since the armies of both sides rank highest among all the Chinese in offensive qualities.

Will Continue Aid In West

United Church Of Canada Pledges Relief For Saskatchewan

Montreal, Que.—A new challenge to the Christian Church existed in the fact that "complete and extensive disaster had befallen the people of 40,000 square miles of southern Saskatchewan," Rev. William Munroe, D.D., secretary, declared in addressing members of the United Church of Canada, Montreal presbytery, here.

The Presbytery appointed a special committee to aid the central body of the church in gathering and forwarding clothing and other relief material to the stricken community. It was emphatically stated that the church would stand behind its missionary work in Saskatchewan so that the ministry there would be fully maintained.

German Fleet Below Limit

Could Have Twice As Many Ships Under Versailles Treaty

Geneva, Switzerland. — Germany's arms statement showing an army of 100,500 men and 4,500 officers is published by the League of Nations secretariat.

Foreign Minister Julius Curtius in a foreword said that Germany had not yet been able to build her fleet up to the limit laid down in the Versailles treaty and that the report revealed "how meagre Germany's armament is compared with other states of corresponding territory and population.

"The navy possesses for example only four commissioned ships of the line, whereas according to Article 181 of the Versailles treaty and the regulations of the inter-allied marine control commission six ships of the line should be in service and two ships of the line in reserve, in other words twice as many."

State Hospitals

Hospitals Maintained By the State Visualized For the Future

Victoria, B.C.—Hospitals maintained by the state was a visualization of the future given by Hon. S. L. Howe, provincial secretary, at the opening of the fourteenth annual convention of the British Columbia Hospitals' Association.

"I am of the opinion that the time will come when the health of the people will be a state obligation," said Mr. Howe.

Boat Clears For Scotland

Fort Arthur, Ont.—The freighter "Dewstone" of the Newfoundland-Halifax Transportation Company cleared from Port Arthur recently for Aberdeen, Scotland, with 1,600 tons of flour. This is the first boat this year to leave Port Arthur with a cargo direct for overseas. One boat left here for the Atlantic trip last year.

Church Services.

United Church service every Sunday Evg. at 7.30.

There will be Gospel services every Sunday at 7.30 p.m. at Muir Lake Community Hall.

Stony Plain and District

Mr R B Brooks was a visitor in Stony Tuesday, with two other duck hunters.

Mr W Comisarow returned Monday afternoon from a week-end trip to Calgary.

Rev Hy and Mrs Hennig of Mannville, who had been visiting friends in the Golden Spike and Rosenthal districts, returned on Friday to their home in Mannville.

Mr Geo Koebel, a former Stony Plain electrician, has opened a repair shop under his own auspices at Edson.

Mr Clyde Hyett moved his furniture, on Saturday last, to the Schwindt apartments, at Spruce Grove.

Mr and Mrs Henry Ulmer of Vancouver are at present paying their annual visit to this district.

No. 2 train from Vancouver was about four hours late on Tuesday.

LOST—On Sunday evening, near the fireball, a check on the local bank. Leave at The Sun office.

The high scores at the golf tournament on Labor Day was a tie between Messrs G Barth and H Trapp. A play-off was arranged for Sunday morning last, when Mr Barth won.

Posters are hung up for the Air Show at Stony Plain on Monday, Oct. 12. There is likely to be not over twenty planes in the flying phalanx. There will be stunt flying and possibly a passenger service. The flyers are to have the use of the Fair Grounds, if they guarantee not to disturb the golf greens or tennis courts.

At the local Court Monday Ferd Horn, charged with an offence under the Liquor Act, was found guilty and given three months' imprisonment at the Fort, by Magistrate Williams. The case will be appealed. Mike Capp, on a charge of assault, was bound over to keep to keep the peace for a period of six months.

Barth's orchestra has an engagement to play at the Onoway Community Hall on Tues. Sept. 32.

A dance is billed for the Ukrainian hall Saturday next, Sept. 10. Music by the Fallis orchestra.

Baseball Games.

The long-delayed ball game between Morinville and Stony Seniors was played on the local grounds Sunday afternood. The first game went to Stony Plain by a score of 6 rnns to 5. Morinville got the 2d game by 7 runs to 6.

Stony's lineup: McCulla 1b, Landsman 2b, Zucht 3b, Rosnau ss, Moyer rf, C Fuhr cf, Brox rf, H Loeblich p, Lory c

2d game: Ph Enders and Andy Brass battery; W Brox pinch hitter.

Another big ball game is said to be billed for the local grounds next Sunday afternoon.

Schedule of Mails.

From the East—Every night except Sat.

From West—Mon., Wed. & Friday morning

To the East—Every morning except Sunday.

To West — Sun., Tues. & Friday night.

Spruce Grove News

Mr John Mahoney of Edmonton is at present said to be negotiating for the lease of the Grove hotel for a term of years. If negotiations are successful, the B P will probably re-open about Thanksgiving Day.

Mr Walter Brox wishes to announce that he had the honor of acting as the pinch-hitter in the big ball game at Stony on Sunday last.

Tenders for carrying the mail from the P. O. to the station closed on Friday last, the 11th. Two tenders, from local men, are reported to have been put in.

A number of City cars with duck hunters aboard, were noticed cruising around in the district north, on Tuesday and Wednesday.

A good crowd of ball fans was in attendance on Sunday afternoon at the local grounds when the Juniors beat the visiting team by a good sized score.

In his trips thru the country, Mr Barnhart has noticed that the muskrats are building bigger and better houses for the winter; this being an indication of a long, stormy winter ahead.

Motor Car Trailers.

Under the provisions of the Vehicles & Highway Traffic act the rear number plate must be placed on the motor vehicle so that the lower edge shall not be lower than the axle

Sec. 32 of the Act states that every number plate shall at all times be kept unobscured by any part of the vehicle or its attachment or load or otherwise howsoever, and shall be kept firmly fastened. It is also provided that the rear light must be visible for at least 200 feet towards the rear and so contrived as to illuminate the figures on the number plate.

This means that any motor vehicle having a trailer attached to same must have the rear license plate and rear light placed in such a position that these are not obscured from the rear.

Failure to comply with the above will mean prosecution under the V. & H. T. Act.

The STONY PLAIN SUN

Here and There

One thousand men will be employed and over $500,000 expended on highway repairs in Cape Breton and Richmond counties, Nova Scotia, during the coming autumn.

Miss Pauline Garon, Montreal motion-picture queen, formerly of Hollywood, sailed on the Canadian Pacific liner "Montcalm" recently, to make pictures in England and France.

Salmon taken in 1930 from British Columbia waters totalled close on 37,000,000 weighing more than 216,000,000 pounds. Number of fish was 9,500,000 more than in the biggest previous salmon catch year of 1926.

The New Brunswick Government is preparing to face the problem of unemployment on a practical basis this winter and has instituted a registration system through city and town clerks, who will gather full data as to out-of-works and their families.

Sir Lionel Fletcher, captain of the British rifle team, which competed against Canadian shots at Toronto and Ottawa, following the historic Bisley meeting, was warm in praise of Connaught Ranges, on his return to England. It is hbped that another Old Country team will compete in Canada next year.

Queen Helene of Roumania and her sister, Princess Irene of Greece, gave British railroad officials a shock recently, by travelling from London to Scotland, third class. The Queen smilingly declared that she was very comfortable and did not want people to know she was travelling.

The name of Admiral of the Fleet Earl Jellicoe has been added to the long list of distinguished travellers over Canadian Pacific steamship and rail lines. "Hell-fire Jack," as he is affectionately called, arrived in Montreal on August 22, on the liner "Duchess of York", to open the Canadian National Exhibition, at Toronto.

Hector Macdonald, of Montreal, was winner of the prize offered by E. W. Beatty, chairman and president of the Canadian Pacific Railway, for the competition between pipers representing the 17 Scottish militia units of Canada, at the Highland Gathering recently held in the grounds of the Banff Springs Hotel, Banff, Alta.

Among recent guests at Banff were Congressman and Mrs. Frederick R. Lehlback, of Washington, D.C., and Newark, N.J., on their way to the convention of the National Federation of Federal Employees at Seattle. They expressed themselves delighted with their stay at the Banff Springs Hotel, punctuating a journey from Montreal to the Pacific Coast over Canadian Pacific lines.

H. M. King Prajadhipok of Siam, accompanied by Queen Rambai Barni and a numerous suite, has been seeing real western life, with the Banff Spring Hotel as head quarters. He was recently made a member of the Trail Riders of the Canadian Rockies, following a pack-train expedition, and also attended a rodeo staged for him at Mrs. "Bill" Brewster's dude-ranch, at Kananaskis, Alta. His Majesty has also devoted considerable time to photography, golf and fishing. (7-3)

ENO'S "FRUIT SALT"

To Feel Your Best

Take a dash of ENO'S "Fruit Salt" in a glass of water every morning. Millions do this daily because they know that ENO—gentle, effective, non-habit-forming—is the deadly foe of constipation.

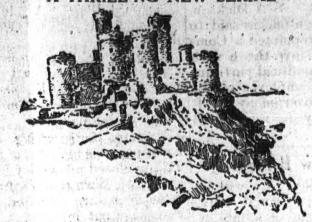
In cases of acid stomach, fatigue, billiousness—ENO is invaluable. For more than sixty years it has been the standby in thousands of well-regulated homes.

But remember, only ENO can give ENO results.

THE HOUSE OF DREAMS - COME - TRUE

BY MARGARET PEDLER

A THRILL'NG NEW SERIAL



From the great castle of Beirnfels, the House-of-Dreams-Come-True, into a world of bitterness and strife and love, went Jean Peterson. Thrilled by a magic day at Montavan, spent with a man of mystery, she was brought face to face with the realization that she loved him—hopelessly.

Tragedy, misery, vengeance dogged at the heels of this beautful love-child the moment she set foot on the shores of England. Disillusioned, broken-hearted, she returned to her castle of shattered Dreams only in time to see it, too, come tumbling down before her eyes, swept by the ravages of fire. But in its place there rose a greater, a more enduring castle—the castle of love—the House-of-Dreams-Come-True.

Cursed from early childhood with an almost uncontrollable temper, and branded in later life by "The Mark of the Beast," Blaise Tormarin committed a crime for which he seemed destined to pay a life-long penalty of mental anguish. But that magic day at Montavan opened for him a new life—a life through which he fought a losing battle against love.

And losing, he yielded to the love of the beautiful girl from the far-off castle, only to find as the wedding day approached, that tragedy still followed, making it impossible for him to marry. Here "Chance," in the person of revenge, stepped in and the world cleared of misery and darkness; and Blaise and Jean found at last their House-of-Dreams-Come-True.

THE HOUSE OF DREAMS-COME-TRUE

— BY —

MARGARET PEDLER

Author of "The Splendid Folly," "The Hermit Of Far End."

Hodder & Stoughton, Ltd., London.

It's a strange road leads to the House of Dreams,
To the House of Dreams-Come-True,
Its hills are steep and its valleys deep,
And salt with tears the Wayfarers weep,
The Wayfarers—I and you.

But there's sure a way to the House of Dreams,
To the House of Dreams-Come-True.
We shall find it yet, ere the sun has set,
If we fare straight on, come fine, come wet,
Wayfarers—I and you.

—Margaret Pedler.

CHAPTER I.

The Wander-Fever

The great spaces of the hall seemed to slope away into impenetrable gloom; velvet darkness deepening imperceptibly into sable density of panelled wall; huge, smoke-blackened beams, stretching wide arms across the roof, showing only as a dim lattice-work of ebony, fretting the shadowy twilight overhead.

At the furthermost end, like a giant golden eye winking sleepily through the dark, smouldered a fire of logs, and near this, in the luminous circle of its warmth, a man and woman were seated at a table lit by tall wax candles in branched candlesticks. With its twinkling points of light, and the fire's red glow quivering across its shining surface, the table gleamed out like a jewel in a sombre setting—a vivid splash of light in the grey immensity of dusk-enfolded hall.

Dinner was evidently just over, for the candlelight shone softly on satin-skinned fruit, while wonderful gold-veined glass flecked the dark pool of polished mahogany with delicate lines and ripples of opalescent colour.

A silence had fallen on the two who had been dining. They had been gay enough together throughout the course of the meal, but, now that the servants had brought coffee and withdrawn, it seemed as though the stillness—that queer, ghostly, memory-haunted stillness which lurks in the dim, disused recesses of a place—had crept out from the four corners of the hall and were stealing upon them, little by little, as the tide encroaches on the shore, till it had lapped them around in a curious atmosphere of oppression.

The woman acknowledged it by a twist of her slim shoulders. She was quite young—not more than twenty—and as she glanced half-enquiringly at the man seated opposite her there was sufficiency of likeness between the two to warrant the assumption that they were father and daughter.

In each there was the same intelligent, wide brow, the same straight nose with sensitively cut nostrils—though a smaller and daintier affair in the feminine edition, and barred across the top by a little string of golden freckles—and, above all, the same determined, pointed chin with the contradictory cleft in it that charmed away its obstinacy.

But here the likeness ended. It was from someone other than the dark-browed man with his dreaming, poet's eye—which were neither purple nor grey, but a mixture of the two—that Jean Peterson had inherited her beech-leaf brown hair, tinged with warm red where the light glinted on it, and her vivd hazel eyes—eyes that were sometimes clear and still and brown like the waters of some quiet pool cradled among the rocks of a moorland stream.

They were like that now—clear and wide-open, with a certain pensive, half-humorous questioning in them.

"Well?" she said, at last breaking the long silence. "What is it?

The man looked across at her, smiling a little.

"Why should it be—anything?" he demanded.

She laughed amusedly.

"Oh, Glyn, dear"—she never made use of the conventional address of "father." Glyn Peterson would have disliked it intensely if she had—"Oh, Glyn dear, I haven't been your daughter for the last twenty years without learning to divine when you are cudgelling your brains as to the prettiest method of introducing a disagreeable topic."

Peterson grinned a little. He tossed the end of his cigarette into the fire and lit a fresh one before replying.

"On this occasion," he observed at last, slowly, "the topic is not necessarily a disagreeable one, Jean"—his quizzical glance raked her face suddenly—"how would you like to go to England?"

"To England?"

Her tone held the same incredulous excitement that anyone unexpectedly invited to week-end at El Dorado might be expected to evince.

"England! Glyn, do you really mean to take me there at last?"

"You'd like to go then?" A keen observer might have noticed a shade of relief pass over Peterson's face.

"Like it? It's the one thing above all others that I've longed for. It seems so ridiculous to be an English-woman and yet never once to have set foot in England."

The man's eyes clouded.

"You're not—entirely—English," he said in a low voice.

Jean knew from what memory the quick correction sprang. Her mother, the beautiful opera singer who had been the one romance of Glyn Peterson's life, had been of French extraction.

"I know," she returned soberly. "Yet I think I'm mostly conscious of being English. I believe it's just the very fact that I know Paris—Rome—Vienna—so well, and nothing at all about England, that makes me feel more absolutely English than anything else."

A spark of amusement lit itself in Peterson's eyes.

"How truly feminine!" he commented drily.

Jean nodded.

"I'm afraid it's rather illogical of me."

Her father blew a thin stream of smoke into the air.

"Thank God for it!" he replied lightly. "It's the cussed contradictoriness of your sex that makes it so enchanting. If women were logical they would be as obvious and boring as the average man."

He relapsed into a dreaming silence. Jean broke it rather hesitatingly.

"You've never suggested taking me to England before."

His face darkened suddenly. It was an extraordinarily expressive face—expressive as a child's, reflecting every shade of his constant changes of mood.

"There's no sense of adventure about England," he said shortly. "It's a dull corner of the world—bristling with the proprieties."

Jean realised how very completely, from his own point of view, he had answered her. Romance, beauty, the sheer delight of utter freedom from the conventions were as the breath of his nostrils to Glyn Peterson.

Born to the purple, as it were, of an old English county family, he had stifled in the conventional atmosphere of his upbringing. There had been moments of wild rebellion, bitter outburst against the established order of things, but these had been sedulously checked and discouraged by his father, a man of iron will, who took himself and his position intensely seriously.

Ultimately, Glyn had come to accept with more or less philosophy the fact of his heirship to old estates and old traditions, with their inevitable responsibilities and claims, and he was just preparing to fulfil his parents' wishes by marrying, suitably and conventionally, when Jacqueline Mavory, the beautiful half-French opera singer, had flashed into his horizon.

In a moment the world was transformed. Artist soul called to artist soul; the romantic vein in the man, so long checked and thwarted, suddenly asserted itself irresistibly, and the very day before that appointed for his wedding, he and Jacqueline ran away together in search of happiness.

And they had found it. The "County" had been shocked; Glyn's father, unbending descendant of the old Scottish Covenanters, his whole creed outraged, had broken under the blow; but the runaway lovers had found what they sought.

At Biernfels, a beautiful old schloss on the eastern border of Austria, remote from the world and surrounded by forest-clad hills, Glyn Peterson and Jacqueline had lived a romantically happy existence, roaming the world whenever the wander-fever seized them, but always returning to Schloss Beirnfels, where Peterson had contrived a background of almost exotic richness for the adored woman who had flung her career to the winds in order to become his wife.

(To Be Continued.)

Crude weighing machines based on the balance were used in Egypt at least 5,000 years before the Christian Era.

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother Graves' Worm Exterminator to drive out the parasites.

A new anti-craft gun, built in England, is capable of striking airplanes more than five miles up in the air.

Little Helps For This Week

"Changed into the same image from glory to glory."—2 Corinthians iii. 18.

As one lamp lights another, nor grows less,
So nobleness enkindleth nobleness."

—James Russell Lowell.

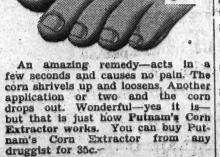
In a very simple and literal way he believed that God was His Father, not in name only, but in very truth. He knew that he, in common with every human being, had it in his power to live as a son or as an alien; and he knew—by that most sure proof, the experience of daily life—that he could only overcome the cravings of selfishness by a constant effort to come into closer union with the life-giving spirit to whom he was truly akin, that so he might not starve, but grow and develop.—Knight-Errant.

A Household Medicine.—They that are acquainted with the sterling properties of Dr. Thomas' Eclectric Oil in the treatment of many ailments would not be without it in the house. It is truly a household medicine and as it is effective in dealing with many ordinary complaints it is an inexpensive medicine. So, keep it at hand, as the call for it may come most unexpectedly.

Alberta Homesteads

Homestead entries in Alberta for the month of July numbered 1,114, more than half of which were taken out through the Edmonton land office. Of the total for the month, 331 entries were made by women, this being the first occasion in which the new law enabling women to homestead has been in operation.

CORNS LIFT OFF



An amazing remedy—acts in a few seconds and causes no pain. The corn shrivels up and loosens. Another application or two and the corn drops out. Wonderful—yes it is—but that is just how Putnam's Corn Extractor works. You can buy Putnam's Corn Extractor from any druggist for 35c.

Sec.-Treas. of the Municipality of Inga No. 520
Postoffice, Stony Plain.

Another Investigation.

Another investigation into allegations of civil servants' political partisanship in the last Federal election is to be carried out, says a despatch from Ottawa. S A Dickson, K. C., Edmonton, is said to have been appointed a Commissioner to investigate such charges of political partisanship against employes of the Dominion Government in Alberta as may be referred to him.

The New Holiday.

Thanksgiving Day will be celebrated this year Monday, Oct. 12. Fixing of a date by the Federal Gov't for the observance of Thanksgiving day separate from Remembrance day is a departure from the former practice. Remembrance day will be commemorated each year on Nov. 11.

Duffield Doings.

On Tuesday next, Sept. 22, the Duffield Women's Institute will hold its regular meeting, with Mesdames Sutton and Clements convenors. The feature of the meeting will be a "Ten-cent Tea." Subject—A Day with Canadian Authors. Roll Call, Famous Canadians, and why famous. Hostesses, Mesdames McGuire, Clements and Heap (the president).

Drawing a Bead.

Farmers living adjacent to the breeding places of the ducks did not have their early morning rude awakening by the shotgun fusilade on Tuesday last, the opening day for shooting, as in former years. The new Game regulations forbids the popping at the feathered beauties until the latter are engaged at their midday repast.

The duck hunters of the district have usually favored the evening for their operations, when the honkers come to the grain fields for the last feed of the day.

The season closes on Nov. 14th this year—a month earlier than usual.

More "Sound Advice."

It is dangerous to give advice to wheat growers to hold their wheat in bins on their farms this year, and if they have livestock to feed it to, but at the present outrageously low prices it looks like sound advice for those who are financially fixed to put it into force, says the Lethbridge Herald.

Dairy Pool Ships 100 Tons of Butter to Britain.

Western Canada dairy producers will be pleased to know there is a general effort being made by the creamery interests in the west to export our surplus butter to British markets, rather than keep it here to hold down the price. Northern Alberta Dairy Pool recently made a shipment of butter East for export amounting to over 200,000 lbs. Dairy Pool members and others who have had to sell cream at world levels, will appreciate the fact that everything is being done to relieve the Canadian market of surplus butter and thus hasten the day when cream prices can be restored to more profitable levels.

We Noticed on Monday:

A prominent implement dealer making a long turn onto Main St. in his jitney, heading north on a rush order with a whiffletree.

Friends of Mr. Sam Comisarow wishing him a Happy New Year.

Mr Hargreaves going south on the Main st.m. with his five-pack-horse Rocky Mountain outfit.

Jack McGillis starting out on a fresh-air excursion in the Blewja car.

The glazier installing a new shop window for Bill Kelly.

E H Baron taking home a case of shells.

Mr Lewis discussing, with another golf enthusiast, the holding of a tournament on Thanksgiving day.

Mr Albert Wurtz coming down street with a fresh haircut and minus his chapeau.

Fireman Turnitton wondering who'll pay for the damage to his Sunday pants.

Val J Kulak planning, with another W-Leaguer, for their Big Rally next Sunday.

Holborn Happenings.

Residents of Holborn district are wondering what has become of the proposition mooted a short time ago, to have the market road from Stony Plain to Holborn Corner gravelled. A meeting was to have been called, to get the affair started, but, to date, nothing has materialised.

Mr Magnus Larson, a popular young sport from Stony Plain, is spending a vacation with friends in this district, at present.

There was a fair turnout of localites at the dance in the Hall last Friday night.

A Two-edged Sword.

Vegreville Observer: The extension of the Debt Adjustment Act is causing some worry to those who take thought for the morrow. According to an advt published in this and other papers last week, the Government—with possibly the best intentions in the world—seems to be placing undue stress on the necessity of a farmer making what amounts to an assignment, if he finds himself in temporary difficulty. It seems strange to find a Government coaxing people to proclaim themselves bankrupt. To facilitate this singular idea of giving assistance the proposal is being made to establish branch offices at various points in the province to render bankruptcy easy.

It does seem to us that the Government should encourage farmers—and other people, too—to keep out of making any assignment, or what is tantamount to an assignment, just as long as they possibly can. A slogan of "Assignments While You Wait," is, we think, a most unhappy method of solving anyone's troubles.

The Debt Adjustment Act is in itself a reasonable enough piece of legislation, in its place and within its limits. But the Government is putting it away out of its place and far beyond its sensible limit in apparently endeavoring to induce farmers to make use of it.

Farmers themselves should be ware of bringing themselves under the provisions of the Act. It is a two-edged sword—one blade will cut off or stall off a portion of their debts; but the other blade will just as effectively cut off all their credit standing in the future. This aspect of the matter has not been sufficiently emphasized as it should be.

EVERY FARMER in Western Canada is now free to sell his grain on the open market. Thousands of former customers again look to United Grain Growers to handle their grain.

UNITED GRAIN GROWERS seeks the business of farmers on its long record of satisfactory service, on its financial strength, on its twenty-five years of successful experience in selling farmers' grain on the open market. The open market experience of this farmers' company, taking volume and length of service together, is quite unmatched in Western Canada.

Assure yourself of safety and good service by delivering your grain to a U.G.G. elevator or consigning it to United Grain Growers Limited.
